Presto Mobile

An Easy, Smart, Intuitive Way to Mobilize Your Real-Time Business Intelligence

The fusion of mobile devices and business intelligence can deliver huge benefits for any organization. Mobile business intelligence makes critical data available wherever work is done and this impact is greatest outside the corner executive suite. Mobile business intelligence can make your employees location-independent, supporting even the most information-hungry employees *wherever* they are.

Mobile BI enables faster, just-in-time decision cycles by eliminating the need to request a new report or dashboard from IT. Mobile access delivers a self-service option to assemble and analyze data as needs arise. And this 'do it yourself' approach still leverages the existing BI infrastructure, ensuring decisions are made from data that is high-quality, secure, auditable, and governed.

Mobile business intelligence can support user communities other than the 'desk-bound PC users', bringing decision data to under-served employee constituencies. One recent survey estimated that only 8% of the people in most organizations are using business intelligence. For organizations already engaged in adoption of mobile devices, business intelligence can be a high-impact, low-cost use of those devices.

Presto Mobile Delivers Self-Service Business Intelligence to Smart Phones and Tablets

Presto, JackBe's Real-Time Business Intelligence Platform gives organizations the tools to rapidly and easily assemble Business Intelligence solutions in minutes from any kind of enterprise data source. And now organizations can deliver Business Intelligence to users on the go through Presto Mobile, giving decision-makers easy mobile access to their Real-Time Business Intelligence, turning smartphones and tablets into first-class business decision tools.

No code required, no training necessary.

As a self-service Business Intelligence solution, Presto empowers non-developers to create rich, interactive mobile Apps without having to rely on a developer to get their BI on their mobile devices. And Presto Mobile has an intuitive interface built for business users to easily access those Apps. You won't have to train users to find, favorite, or filter the BI Apps they need.

Why Does an Organization Need Mobile BI?

'Decision making is not something that happens only in the back office or the boardroom.

Decisions are made on the road, in warehouses, in client meetings and in airport lounges, and the decision maker often needs only quick access to a few key metrics shown on a mobile device. This can reduce decision bottlenecks, increase business process performance and enable broader input into the decision at hand.'

-- Gartner, 'Mobile Business Intelligence, Finally', November 2011

Optimized for the way you use your Smartphones and Tablets.

Presto Mobile is optimized to deliver touch experiences when accessed on devices like the Apple iPad. Controls such as filters, parameters, sliders, scrolling are now specially built to interact with your fingers.

Connected directly to your data.

Unlike most business intelligence solutions, Presto does not create disconnected, out-of-date copies of your data. Presto connects directly to your authoritative data sources, whether on-premise, on-cloud, or SaaS, bringing your decision-makers the latest information possible.

For iPhone and iPad Users: Safe Data in an Intuitive Interface

For iPhone and iPad users Presto Mobile includes two native interfaces, providing an intuitive 'personal portal' to Presto.

A native interface for iPhone and iPad Users.

In addition to easy access to Presto Apps from any mobile devices, Presto Mobile also includes two Apps built specifically for iPhones and iPads. The Presto Mobile iPhone and iPads Apps let you login, view, favorite, rate and share any Presto Apps.

As secure as your enterprise applications.

Certified by the Department of Defense to operate with the most sensitive data and on the most sensitive networks, Presto is the most secure business intelligence solution available. Presto Apps provide start to finish security, whether your users are operating from a browser, an iPhone, an iPad or your enterprise portal.

Visit the Apple Store to download and test-drive Presto Mobile for iPhone and Presto Mobile for iPad free of charge using JackBe's Mobile Demo Server.
