

Happy Spring! The mashup folks at JackBe have been busy bees. Since there is so much to talk about in this issue, we thought we'd start with a quick list of links to the good stuff. If you want the details before ya click, skip right to the next section.

- We have a great webinar coming up next week (with a special guest!): [Register for 'The Fast Track to Building an Enterprise App Store using Enterprise Mashups'](#)
- We put our Enterprise Mashup Platform, Presto, on the Cloud: [Read all about Presto on the Cloud](#)
- We're taking our mashups on the road: [Find out where JackBe is going to be](#)
- We've written a great new whitepaper: [Download 'Nimble Intelligence: Enterprise BI Mashup Best Practices'](#)
- As usual, we've blogged our brains out: [Check out all the latest mashup blogs](#)
- We scheduled helpful Mashup Training Classes for the rest of the Spring: [Get the class details and schedule](#)
- The next major release of Presto, version 3.0, is coming: [Get an early look at some of the cool Enterprise App Store features of Presto 3.0](#)

## Upcoming Webinar

### ['The Fast Track to Building an Enterprise App Store using Enterprise Mashups'](#)

Sure, you know what an 'App Store' is. But do you know how it can help your enterprise with strategic objectives like compliance, governance, transparency, profitability, and efficiency? And do you know the quickest way to get your Enterprise App Store going?

On Wednesday, April 28, 2010 at 11am EST you are invited to join Enterprise 2.0 strategist and founder of Web 2.0 University, Dion Hinchcliffe, as he discusses the what, why and how of the Enterprise App Store. Once you see how your next the killer app comes from your own enterprise app store, your view of enterprise applications will never be the same.

## Mashups in the Cloud

'Cloud Computing' is running applications (usually your own) on Internet-based computing resources (usually not your own). Although you may not know it, you probably do some of this already.

And now you can create mashups on the cloud with JackBe's Presto. 'Presto on the Cloud' is our award-winning Presto Enterprise Mashup

Server running on Amazon's Elastic Compute Cloud.

We are offering this new mashup experience to help you instantly create mashups. We wanted to make it as easy as possible to mash with Presto and now you can start mashing in seconds. Getting started couldn't be easier: watch the 5 minute video on the [Presto Cloud login page](#).

## Where in the world is JackBe gonna be?

In 2010, JackBe is going to be speaking and exhibiting at a lot of conferences. Here's a list of some of the some of the places you can find us. And remember you can always check the JackBe [Events Page](#) for the most up-to-date listing of our upcoming shows and events.

### [SOA Symposium](#)

The Symposium brings together lessons learned and emerging topics from both government and industry SOA projects, practitioners and experts. JackBe's John Crupi will be presenting 'Supertankers, Microchips, Missiles, and the Da Vinci Code: Lessons Learned Delivering 'Your' Services to 'Those' Users through Mashups'.

### [KMWorld "Making the Most of Your SharePoint Investment"](#)

In this live webcast, JackBe's Dan Malks will share his experience, expertise and insight into making the most out of your existing SharePoint deployment

### [2010 DISA Customer Partnership Conference](#)

JackBe will again be exhibiting at the DISA Customer Partnership Conference, which brings together DISA customers, industry partners, senior decision-makers, and subject matter experts of collaboration and knowledge sharing.

### [Open Government and Innovations Conference](#)

Stop by JackBe's booth at the 2010 OGI Conference and leave with a better understanding of how to achieve your agency's mission through our mashup solutions for transparency.

### [2010 DODIIS Worldwide Conference](#)

JackBe will be exhibiting at DODIIS 2010 in support of the DIA's focus on information sharing alliances and timely, objective, actionable intelligence for senior decision makers and the war fighters.

### [Gov 2.0 Expo 2010](#)

JackBe CTO John Crupi, along with Steve Willett, team member on the Defense Intelligence Agency's ICDL ('Intelligence Community Data Layer') will be presenting 'Pirates, Missiles, and Terrorists: Practical Mashup Lessons from the US Intelligence Community'. We'd love to have you join us at the event!

## How Nimble is Your Intelligence?

Do you spend weeks or months waiting for information to be integrated into your data warehouse? Do you or your IT staff want to securely publish data with peers or partners, maybe outside of your corporate firewall? Do you want to discover new markets and channels by expanding the use of your Business Intelligence assets?

Don't miss out on this great opportunity for a FREE whitepaper from BI industry guru Seth Grimes: [Nimble Intelligence: Enterprise BI Mashup Best Practices](#).

In this whitepaper, Seth Grimes addresses today's new data challenges: agility, sharing and collaboration. He also outlines the important solution elements in a 'nimble intelligence' solution, as well share his thoughts on potential usage scenarios and stories.

## Blogs, Blogs and Blogs

Apps, Stalactites, Robots and Freedom! We like to think that the mashup blogs at JackBe are never boring. But you be the judge:

[Does Your Enterprise Suffer from the Stalactite Effect?](#)

[Have a problem? There's a mashup app for that.](#)

[How Agile is Your Business Intelligence?](#)

[How Much Freedom Does Your Data Have?](#)

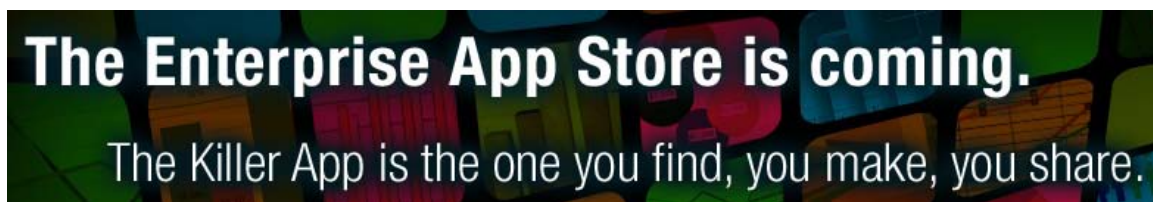

## Mashup Training Classes

Did you know that you can get instructor lead [hands-on Presto Training](#)?

The '[Fast Track to Presto Enterprise Mashups](#)' course is two days of training that includes hands-on exercises teaching how to use Presto. It also includes advanced topics that explain how developers take advantage of Presto to Mashup-enable both new and existing applications.

The next 3 classes are in Washington, DC: May 20 - May 21, Jun 17 - Jun 18, Jul 22 - Jul 23. [Register online](#).

## Presto 3.0 is Coming!

The next major release of Presto, version 3.0, is coming soon. Our award-winning enterprise mashup platform is

getting some major new features that can help you achieve your Enterprise App Store. You can learn more about the new Enterprise App Store features of Presto 3.0 [click here](#).
